Tournament is now in the books and it was nice to see some highlights of the voting on the cover of the Official Scoring System. This day the fans and the media take a look at the top ten rated players in the field.

John Daly has had a stellar career at the Masters, never finishing worse than second place (in 1994). His appearance in the tournament is on the short end of the pole of his career, but there are definitely good signs he will have a good shot at adding his third green jacket.

Rory McIlroy is doing some great things with his game and has enjoyed tremendous success with the putter. His seven top ten finishes in the last nine majors is a testament to his ability to shoot well in the toughest of conditions. Jordan Spieth has grown into his role as the new face of the game, as he is now in the mix in winning major events. He isn't a lock to win the green jacket like some other players on this list, but Spieth has the talent and the ability to take down the field. Adam Scott is the most experienced golfer in the field and has won four times at Augusta National. The major is still his best chance at winning the green jacket, and he will need a strong showing in the first round. As for the rest of the list, there are some names that might surprise a few people. Justin Rose is one of the top contenders for the green jacket and has already won a PGA Tour event. But did you know he has

. Single malt distillery review. There are 113 distilleries in the UK today, some of them

small, most of them medium or large, and most of them family-owned for five or more generations. But how many of them are producing the cream of Britain's whisky production? So we looked for the rare ones. Here's seven. When it comes to the world of Scotch whisky, even a casual observance of box labels and barrel sample sizes reveals a vast, vast world, and only by cracking open well-to-do barrels at the end of the day do we ever know precisely how a single malt, blended malt or single cask single was born.

But while geographies and styles vary enormously across the globe, there are many more variations and small differences behind the labels. To help us sort the outta here, we've joined forces with other whisky experts for this round-up of underrated malt-lovers among the Scotch industry, to find out which ones you'd be hard-pushed to notice, and which have produced some hidden gems to rival the pricier brandies.

Single malt distillery review. How we've done it... First we knew we wanted to focus on one distillery at a time, rather than multiple distilleries, in order to cover all the styles and to highlight the exceptional efforts being made by distillers across the industry to recreate the heritage of Scotland's malt whiskeys. Some distillers may only produce a limited selection of single malts, but in terms of variety and different styles, there are few distilleries to match more than the remote and historic Jura. We scoured the internet and whisky publications to find out more about each distillery, and conducted plenty of research by talking to experts in the industry to learn from the distillers who know their stuff. Now

we just had to narrow the field down to seven, and we did that by sifting through all the winners and losers in each category. And as more or less each individual winner varies from the chosen winner itself, in each case the chosen distillery we've listed is only the one of those seven finalists that it was impressed with. So once you've experienced the flavour of a single malt, keep an eye open in the future - you may well find your favourites becoming more easily available while specialist varieties get harder to come by. Scotland In 2015, producer John Haig showed
